

TETRA AEROMECH

HIGH-PRECISION MACHINING & ADVANCED MANUFACTURING

Structure: Partnership Firm | **GSTIN:** 29ABAFT2418G1Z9 | **Location:** Peenya 2nd Stage, Bangalore
Target Sectors: Aerospace, Defence, Medical Devices, Automobile & General Engineering

ABOUT US — ENGINEERING EXCELLENCE

Tetra AeroMech is a precision engineering and manufacturing company established by a team of four mechanical engineering professionals with expertise in CNC machining, production, quality assurance, and manufacturing processes. We specialize in the manufacturing of high-precision machined components and assemblies for various industries, including aerospace, defence, medical equipment, automobile, and general engineering sectors.

4 Mechanical Promoters Full Engineering Synergy	Peenya Industrial Hub Strategic Bengaluru Ecosystem	Aerospace & Defence High-Tolerance Manufacturing	100% Quality Assurance Systematic Inspection Regimes
---	---	--	--

OUR VISION

To become a trusted global manufacturing partner by delivering precision-engineered products with the highest standards of quality, reliability, and innovation.

OUR MISSION

- Deliver high-quality precision components.
- Maintain customer satisfaction through on-time delivery.
- Continuously improve manufacturing processes and technology.
- Build long-term relationships with customers and partners.

MANAGEMENT STRUCTURE — TECHNICAL LEADERSHIP

Hemanth Production Management & VMC Responsibilities: Production planning, scheduling, resource allocation, timely delivery, and VMC programming. Direct Contact: +91-9886347033	Yeshwanth Quality Assurance & Client Handling Responsibilities: Inspections, quality documentation, customer communication, enquiries, and customer satisfaction. Direct Contact: +91-8792119598
Rakesh CNC / VMC & 5-Axis Programming Responsibilities: 5th-axis programming, process planning, tooling selection, and machining cycle optimization. Direct Contact: +91-8310934188	Divakar Manufacturing Operations Responsibilities: Shop-floor operations, machine coordination, manpower allocation, and production flow. Official Contact: tetraaeromech@gmail.com

BUSINESS OBJECTIVE

To provide reliable and cost-effective precision manufacturing solutions to domestic and international customers while contributing to the sustainable growth of the precision engineering and advanced manufacturing sector.

QUALITY COMMITMENT

Tetra AeroMech is committed to maintaining strict quality standards through systematic inspection, rigorous process control, and continuous improvement practices to exceed customer technical requirements.

MACHINING INFRASTRUCTURE & CNC VERTICAL MACHINING CAPABILITIES

CNC Vertical Machining Centers	COSMOS CVM 800	COSMOS CVM 1160
X-axis travel	800 mm	1100 mm
Y-axis travel	500 mm	650 mm
Z-axis travel	500 mm	600 mm
Table size (L × W)	1000 × 500 mm	1250 × 600 mm
Maximum table load	600 kg	1000 kg
Spindle taper	BBT 40	BBT 40
Spindle speed	8,000 rpm	8,000 rpm
Mitsubishi motor power	11 / 15 / 18.5 kW	11 / 15 / 18.5 kW
Tool capacity	30 nos (optional)	30 nos (optional)
Machine Configuration	High-Rigidity Precision VMC	Heavy-Duty Large Envelope VMC

PRODUCTS & SERVICES CAPABILITIES

- Precision CNC Machined Components.
- Milling and Turning Components
- Aerospace & Defence Components
- Medical Device Components
- Automobile Components
- Custom Engineering Solutions & Prototyping

Special Processes (External Qualified Partners):
Support for specialized treatments: anodizing, plating, powder coating, glass bead blasting, tumbling, passivation, blackening, and EDM.

MANUFACTURING INFRASTRUCTURE & METROLOGY

- **CNC Milling Centers:** High-rigidity vertical machining centers.
- **CNC Turning Centers:** Planned future roadmap expansion.
- **Precision Measuring Instruments:** Calibrated verniers, micrometers, height gauges, bore gauges, and surface plates.
- **Quality Inspection Facilities:** In-process and final inspection regimes.
- **CAD / CAM Support:** Multi-axis CAD/CAM toolpath modeling & 5-axis post-processing optimization.

MANUFACTURED PRECISION COMPONENTS PORTFOLIO

Avionics Chassis Baseplate
CNC 5-Axis Precision Milled • Aerospace

Finned Cold Plate (Thin Fin)
High-Aspect Ratio Heat Sink • Electronics

Turned & Milled Clevis Shafts
Dual-Operation Turning & Milling • Linkages

2.1mm Micro-Slotted Guide
Micro-Slotting & Precision EDM • Tooling

Treated Guide Bracket
Surface Treated Structural Mount • Automation

Precision Brass Bushing
High-Tolerance Turning & Internal Bore

FUTURE GROWTH & QUALITY ROADMAP

- Adding more advanced CNC machines (5th Axis) and equipment.
- Expanding our customer base across India and overseas.
- Obtaining quality certifications such as AS9100.
- Increasing production capacity and skilled workforce.

- Developing expertise in aerospace and defence components.
- Adopting new manufacturing technologies and automation.
- Building long-term relationships through quality & timely delivery.
- Expanding specialized surface treatment & test partnerships.

Conclusion: Tetra Aeromech combines technical expertise, entrepreneurial vision, and a commitment to manufacturing excellence. With experienced promoters, a strategic location in Peenya, and a focus on precision engineering, the company is well-positioned to capitalize on emerging opportunities in aerospace and advanced engineering sectors and achieve sustainable long-term growth.

TETRA AEROMECH — CORPORATE DIRECTORY

Business Activity: Manufacturing all precision components & assemblies.

Industry Domains: Aerospace, Defence, Medical, Automobile & General Engineering

GSTIN: 29ABAF2418G1Z9 (Government of India Verified)
